First-year CSE student at SRMIST seeking a software development internship. Experienced in full-stack web development with React, Node.js, and MongoDB, with a focus on building scalable APIs and AI-integrated applications.

Education

SRM Institute of Science and Technology (SRMIST) Kattankulathur, TN
Bachelor of Technology in Computer Science and Engineering *Aug 2025 – May 2029*

- **SGPA:** 9.14/10.0
- **Relevant Coursework:** Data Structures & Algorithms, OOP (C++/Python), Artificial Intelligence, Web Development.

Technical Skills

Languages: C++, Python, Java, JavaScript, TypeScript, HTML/CSS
Frameworks/Libraries: React.js, Node.js, Express.js
Tools & Databases: MongoDB, Supabase, Git, GitHub, Vercel, RESTful APIs
Competitive Programming: 20+ problems solved on LeetCode/HackerRank · [Max Rating/Achievement]

Projects

Nexus Athlete App | *Full-Stack, React, Node.js, MongoDB* *In Development (Target: Mid-2026)*

- Developing a comprehensive platform for athletes to track and analyze 10+ key performance metrics utilizing a scalable backend architecture.

KanbanFlow | *React, TypeScript, Tailwind CSS, Vite* Live Link | GitHub Link

- Built a fully-featured, single-page Kanban board with drag-and-drop task movement across unlimited customizable columns, priority tagging, and live search/filtering.
- Implemented a zero-backend architecture with full `localStorage` persistence, eliminating server dependency while delivering a responsive, mobile-friendly UI with dark/light theme toggle.

Task Management RESTful API | *Node.js, Express, MongoDB* GitHub Link

- Engineered RESTful endpoints supporting robust CRUD operations tested across multiple concurrent sessions.
- Optimized data flow and routing logic to reduce response latency and ensure secure manipulation of user task data.

Hackathon Team Website | *TypeScript, Web Technologies, Vercel* Live Link

- Expanded and deployed the official website for a 4-member hackathon team as Founder & Lead Developer, showcasing tech stacks and projects.
- Incorporated a custom systematized email response system for the site's "Join Us" recruitment form.

Personal Portfolio | *TypeScript, Responsive Design* Live Link

- Designed and launched a fully responsive portfolio via Vercel on a custom domain, achieving sub-second load times for 100% of pages.

Certifications & Achievements

Enduro Software Training Program Oct 2025
IIT Hyderabad

- Completed a 4-week intensive software training course focusing on modern full-stack development methodologies.
- Gained practical experience utilizing contemporary web frameworks to execute complex deployment tasks.

Leadership & Involvement

HackerRank Campus Crew (HRCC) Oct 2025 – Present
Technical Member *Kattankulathur, TN*

- Contributed to organizing **Overclocked**, a campus coding contest on HackerRank with 500+ participants, co-designing 5 problems (3 Easy, 1 Medium, 1 Hard) and engineering 10+ test cases.
